

Gingerbread man experiment

Talk to your child about what would happen if the *GBM* hid in different liquids/materials so that the wolf could not see him.

Can your child think of good and bad materials for the *GBM* to hide in?

The children will draw a picture of what they predict will happen when he goes in the mixture and then place the biscuit into the pot and then the children will draw what happens to him.

Good materials to try:

- rice
- water
- glue
- oil

Discuss with your child what has happened to the *GBM*!

When the *GBM* goes in the water tell the children that he has **DISSOLVED** and teach them the word and describe that this is when something breaks up and goes into the water.
